SAFETY INSTRUCTIONS - READ CAREFULLY!

WARNING!

1. Do not exceed the maximum operating pressure: **15psi (1.03 bar)**.
2. Over inflation will increase the risk of bursting.
3. This iSUP does not contain flotation material and may sink when flooded.
4. Area of use: protected coastal zones to 300m.
5. Warning: in offshore winds and currents, do not use in high wind speeds or wave heights greater 0.5m.

Paddlesports can be very dangerous and physically demanding. The user of this product should understand that participating in paddlesports may involve serious injury or death. Observe the following safety standards whenever using this product:

- Read the instruction manual carefully before use.
- Obtain certified first aid training and carry first aid and safety/rescue equipment.
- It is recommended to always use a nationally approved personal flotation device.
- Always wear a helmet where appropriate.
- Dress appropriately for weather conditions, cold water and/or cold weather can result in hypothermia.
- Never paddle alone. Make sure you are accompanied at all times.
- Do not paddle in flood conditions.
- Be aware of appropriate river water levels, tidal changes, dangerous currents and weather changes.
- Scout unfamiliar waters / places to port at shore where appropriate.
- Do not exceed your paddling ability.
- Consult a doctor prior to beginning your paddle sports training.
- You must not use alcohol or mind altering medication prior to, or during use of this product.
- Follow the manufacturer’s recommendations for the use of this product.
- If additional outfitting is added to this craft, use manufacturer’s approved material only; do not impair entry or exit access.

MAXIMUM USER & WEIGHT

**USING THE HIGH PRESSURE PUMP**

**Deflating the iSUP**
1. Remove any mounted accessories from the iSUP e.g. stabilising fins.
2. Locate the high pressure inflation valve to the rear of the iSUP. Remove the cap by twisting 90° anti-clockwise.
3. Firmly press the small pressure release valve down and twist 90° to open the valve. 
   **Note:** the iSUP is under high pressure the air will release quickly and with force.
4. Begin rolling the iSUP from the front to push the remaining air out through the open valve.
5. Once empty turn the pressure release valve 90° to close for next use.
6. Replace the valve cap and turn 90° clockwise to lock.

**Inflating the Clever Airpro® iSUP**
- Maximum operating pressure: 15psi (1.03 bar) must not be exceeded.
- Avoid excessive inflation of the air chamber to prevent danger of the material stretching or the seams bursting.
- Please use the high pressure pump provided with this purchase.
- The hose has an adapter specifically for use with high pressure valves.
- Do not use a compressor or a compressed air bottle to inflate, as this can cause damage to the iSUP and will void any warranty.
- The material may stretch a little following initial inflation and will never return to its original size.
- If you leave the board exposed in the hot sun, check the pressure and deflate slightly if required.
- Pump up the air chamber so that it feels solid to the touch and no wrinkles can be seen in the material. N.B. When fully inflated small dimples can be seen on the boards top and bottom surfaces.
- Ensure the iSUP is inflated to its recommended pressure before use.

**Note:** Lay out the iSUP (A) on a flat even surface, making sure it is clear of any sharp objects with the EVA Deck (V) facing upwards and follow the directions below to inflate:
1. Firmly attach the Pressure Gauge (J) into the High Pressure Pump (H) turning clockwise to lock in place.
2. Next attach the end of the pump hose (I) into the pressure gauge (J) turning clockwise to lock in place.
3. Locate the high pressure inflation valve (VII) to the rear of the iSUP and remove the cap by twisting 90° anti-clockwise.
4. Twist and push the end of the pump hose (I) into the high pressure valve on the iSUP (A).
5. Inflate the iSUP (A) using the high pressure pump (H) until fully inflated to the recommended pressure.
6. Once fully inflated remove the pump hose from the high pressure valve by turning 90° anti-clockwise.
   You may hear a small rush of air for a second as the hose is removed.
7. Replace the valve cap (VII) to ensure the iSUP is air tight.
ATTACHING THE STABILISING FIN

ASSEMBLY

Note: We recommend installing the fin after inflating the iSUP.

1. Turn the iSUP (A) over and lay top down on a flat even surface, making sure it is clear of any sharp objects.
2. Locate the removable stabilising fin mounting point (X) on the base of the iSUP.
3. Slide the stabilising fin (B) into the mounting point with the arch facing the front of the iSUP, ensure that the locking pin is kept clear.
   Note: The fin may be stiff to install and require a small amount of force to seat correctly.
4. Locate the locking pin insert point towards the rear of the fin and push the pin through until it clicks in place.

STORAGE

We advise that you remove the iSUP stabilising fin when not in use or packed away to prevent damage.

1. Turn the iSUP (A) over and lay top down on a flat even surface, making sure it is clear of any sharp objects.
2. Locate the removable stabilising fin mounting point (X) on the base of the iSUP.
3. Locate the locking pin insert point towards the rear of the fin.
4. Press the release clip down on the end of the locking pin and remove to unlock the fin.
5. Slide the stabilising fin (X) towards the front of the iSUP and out of the mounting point.
   Note: The fin may be stiff to remove and require a small amount of force to unseat.
Attaching the Paddle End
1. Locate the locking pin to the end of the aluminium paddle body (F).
2. Press the locking pin down and insert the pole (F) into the end of the paddle fin (E).
3. Align the locking pin with its respective hole to lock the paddle in place.

Attaching the Adjustable Paddle Grip
4. Locate the locking clasp to the end of the aluminium paddle body (F) and pull up to release.
5. Insert the adjustable paddle grip (G) into the end of paddle body (F) and align the number indication hole with the recess to set the desired length.
6. Push the locking clasp down fully to lock the grip in place.

Attaching the Ankle Leash
Wherever possible we advise using a suitable ankle leash (C) when using your iSUP.
1. Locate the ankle leash D-Ring (VI) and insert elastic end of ankle leash through.
2. Open elastic loop and feed entire leash through and pull tight.
3. Open Velcro and wrap around ankle firmly but ensuring not to over tighten.

Tightening the High Pressure Valve
Over time it is possible that the high pressure inflation valve (VII) may become loose. As part of the repair kit (K) we supply a valve wrench which should be used to tighten the valve to maintain its air seal.
1. Open the high pressure valve (VII) by turning the valve cap (I) 90° clockwise.
2. Insert the valve wrench into the high pressure valve as shown.
3. Firmly grip the outside of the valve and turn wrench clockwise until fully tightened.
Note: We advise that the valve should not be unscrewed fully unless absolutely necessary.
CARE / MAINTENANCE / STORAGE

Only use care products that do not contain traces of acids or petroleum and never use silicone-based products.

- Clean your iSUP thoroughly after every use with fresh water and mild soap to remove salt crystals, sandy granules and other small dirt particles. Leave it to dry completely.
- Whenever you take your board out of the water and deflate it, allow time for it to air out and dry. Neither the skin/hull or the inside chambers will suffer from water damage, but stagnant water could cause mildew and a foul odour.
- Deflate the parts of the iSUP by removing the stoppers from the relevant valves and remove all of the air.
- Carefully roll the iSUP from the front removing any remaining air in the process.
- Store your iSUP in a clean and dry place away from direct sunlight and somewhere with no great temperature fluctuations. Pay attention to the fact, that the iSUP is not wrinkled but lays flat, and keep well out of the reach of rodents.
- All inflatables are sensitive to cold. The iSUP should never be unfolded and inflated at a temperature under 7°C!
- If the atmospheric pressure increases under the blazing sun, this must be compensated by releasing some air from the craft.
- Try to ensure that the iSUP (particularly when inflated) does not come into contact with stones, gravel or sharp objects, and that it is not dragged or pulled along the ground because this can damage the iSUP's skin.
- Only insert suitable pump adaptors into the valve. The wrong type of pump adaptor can damage the valve and void your warranty.

REPAIRING YOUR iSUP

You should not attempt to repair large damaged sections by yourself. You can repair small areas with the enclosed repair kit.

1. Deflate the iSUP completely and clean the area to be repaired thoroughly. Roughen up the damaged area surrounding the hole or tear with a fine sand paper.
2. Cut a patch large enough to cover the damaged area with enough excess to overlap the damaged area by at least 1.25cm on all sides.
3. Apply a high strength glue (not supplied) to the iSUP as well as to the patch. Leave to dry for approx 5 minutes.
4. Press the patch down firmly using a soft cloth. Make sure that you are working on a flat, even surface. Remove any air bubbles with a rounded object, gently pushing the bubbles in an outward direction.
5. Always wait at least 24 hours after a repair before pumping up the iSUP once again.

- Perform all of your repairs in a well-ventilated area.
- Avoid inhaling glue vapours.
- Avoid contact with the skin or the eyes.
- Keep all repair materials (glue, solvents, etc) away from the reach of children.
- Repairs cannot be undertaken to the seam welds.

DISPOSING OF YOUR iSUP

Please dispose of the product and packaging in an environmentally friendly manner, separating different materials for recycling as required! Dispose of this item through an authorised disposal company or through your local waste disposal facilities - ask your local authority for information if further guidance is required. Ensure that you comply with all regulations currently in force.
CHANGED YOUR MIND AND NEED TO RETURN YOUR iSUP? FOLLOW THE BELOW INSTRUCTIONS:

• **Purchased from a UK retailer:** If you have purchased an Airpro® ISUP from a UK retailer and have simply changed your mind, follow the retailers instructions for returns. This will normally require proof of purchase.

• **Purchased from Clever Company:** If you have purchased directly from our website, then please contact us and we will email you instructions for the return of the product. Contact can be made by email or telephone as detailed in the ‘Warranty Claims’ section.

When posting your items back to us, it’s important you clearly mark your parcel with your order number and full name. Ship your unused product, in its original packaging, to the address identified in our email. Again, we recommend that you keep your receipt or order number in a safe place, as you will need it as proof of purchase in the event of any after-sales query.

**POINTS TO NOTE:**

• Under the Distance Selling Regulations, as a consumer you have the right to cancel your order and return the goods if we are notified within a period of 14 days after delivery of the goods.

• You are responsible for shipping the products back to us. We recommend using a traceable shipping method.

• If you choose to cancel your order, we require you, the consumer, to pay the cost of returning the item to us.

• Individual products may be excluded from this guarantee. Check the product description before you place your order.

• We can’t take responsibility for any missing or damaged parcels, so take care when returning your order to us.

If the return is due to any form of product defect, call **+44 (0) 800 0323 313** to initiate the return. In these cases, you may be compensated for the cost of returning the item.

**REFUNDS ON ITEMS PURCHASED THROUGH CLEVERCOMPANY.COM**

Once the items are received by our warehouse, they will be processed and a refund initiated. Your account should be credited within a maximum of 10 business days from the time that the return is received.

**DEFECTIVE ITEMS**

If your item is defective in any way, i.e. it doesn’t work but you can't identify why, in the first instance please consult our FAQ section at clevercompany.com as there may be a simple solution to the issue, if this does not help to resolve the issue, please call us on **+44 (0) 800 0323 313** or email: support@clevercompany.com for assistance.

**DAMAGED ITEMS**

**Purchased from a UK Retailer:** If you receive an order with obvious shipping damage from the retailer, then we suggest the delivery is refused. If the delivery has been accepted and then shipping damage is found, please follow the specific instructions advised by the retailer.

**Purchased from clevercompany.com:** If you receive an order with obvious shipping damage please refuse the delivery. If you have accepted delivery and then find shipping damage, please call the fullfiller immediately using the contact information included with the order.

In all circumstances please save all packaging material and paperwork for the order. Please be aware that if you dispose of packaging material or attempt to return the merchandise without contacting the fullfiller, you jeopardise your chances of making a claim, and you may not receive a credit for the return.

**LIMITS OF RESPONSIBILITY**

Clever Company accept no responsibility for misuse or user damage and/or loss of parts incurred during operation or use of the Airpro® ISUP Range.
WARRANTY

This warranty relates to all Airpro® iSUPs bought in the UK and covers the following areas:

- **12 months from the date of purchase for the Airpro® iSUP Board**
- **6 months from the date of purchase for the Airpro® High Pressure Pump**

This warranty is not transferable if the goods are resold after the original purchase.

Your Airpro® ISUP is designed and manufactured for domestic use only. The Airpro® ISUP Warranty does not extend to any commercial businesses operating in the rental of ISUPs.

**REGISTERING YOUR WARRANTY**

To register your warranty, visit [clevercompany.com](http://clevercompany.com) and complete the form within 28 days of purchase. The warranty will start from the date of purchase which must be verified by proof of purchase.

For up-to-date troubleshooting advice, technical information and FAQs please visit our online help centre at [clevercompany.com](http://clevercompany.com).

**WARRANTY CLAIMS**

This product is designed in accordance with standards for a specific use. Any modifications or transformations could result in serious risk for the user and will void the products warranty.

The item must not be modified and/or fitted with a motor in excess of that allowed by the manufacturer or used in any activities outside normal recreational use (such as races, rental, or commercial usage).

Used in excess of the manufacturers recommended maximum load capacity.

Pressure recommendations, assembly / disassembly and handling procedures must be strictly observed.

The maintenance and the storage procedures must not be neglected.

This warranty does not cover parts and accessories not supplied or recommended by the manufacturer or defects resulting from the installation of such equipment on their products

All repairs covered by warranty must be performed by Clever Company Ltd.

Before making a claim, we may be able to answer your query to common questions, simply visit [clevercompany.com](http://clevercompany.com) for further information.

If the FAQs don't solve the issue and you need to make a claim, please visit our website under the warranty section for further instructions. Alternatively, please contact our dedicated Aftersales Team by email at: support@clevercompany.com - we will endeavour to answer all email messages within 48 hours.

If you need to make immediate contact our Aftersales Team are available on **+44 (0) 800 0323 313**.

Monday – Thursday: 9.00am to 5.00pm
Friday: 9.00am to 4.00pm
INTENDED USE
The iSUP has been designed for private use.

**Area of use:** Protected shoreline up to 300m – for journeys in protected coastal waters, small bays, on small lakes, narrow rivers and canals. Do not use in windy conditions above Beaufort Scale 4 or with a wave height of over 0.5m.

Be aware of safe water levels, tidal changes, currents and obstacles above and below the water.
We do not recommend this product for surfing.

CODE OF CONDUCT / SAFETY NOTICE
This iSUP is a tested and safe piece of water sports equipment however there is always a risk of serious injury or death from drowning, paddlesports can be very dangerous and physically demanding.

By using this product the user acknowledges the risks associated with paddlesports and accepts the risks involved and agrees to follow the safety standards and safe operating practices when using this product.

We urgently ask you to comply with the following rules and regulations:

**WARNING!**
- Your care and self-assessment on the water is extremely important. Never over-estimate your power and steering skills!
  - Remain close to the shore! Keep a constant eye on the weather, storm warnings and possible flare signals!
- Please always follow the safety regulations and laws applicable to lakes and open water, and for your own safety, always wear a tested life-jacket or personal floatation device. We recommend the use of a Board Vest, which are not as low in the back as a PFD.
- Wear a helmet when appropriate.
- Ensure to use the tie leash where appropriate.
- Never allow children to play unsupervised with the packaging materials, or the article itself.
- Do not exceed the maximum weight capacity. Regardless of the number of persons/luggage on board, the total weight must not exceed the maximum stated weight capacity.
- We advise being accompanied by another person when you paddle, if that is not possible ensure someone is aware of your start and finish location, the route you intend on taking and length of time you will be out on the water.
- If a person happens to have fallen overboard, their rescue must take place via the front or rear of the craft. Re-entry at the side can cause the craft to capsize.
- Be cautious in offshore winds and currents! Never paddle in flood conditions.
- Please note that the weight of the occupants of the craft as well as the luggage must be uniformly distributed otherwise the iSUP can capsize.
- Follow the information on the type plate regarding the permitted weight allowance and number of occupants as well as the warning information.
- Always keep to the local navigation regulations.
- Do not carry any sharp or pointed objects.
- The iSUP should be protected against contact with dubious liquids or acids to avoid irreparable damage.
- Check your equipment prior to each use for signs of wear, leaks or failure.
- Protect the iSUP against heat and fire! Take care with lit cigarettes!
- Make sure you do not run aground on stony subsoil to avoid damage to the underside of the iSUP.
- Never transport the iSUP in vehicles when inflated.
- Never leave your unoccupied iSUP on the water. It can be swept away faster than you can swim after it.
- Always carry identification when you paddle.
- Always carry the paddle with you when using the iSUP otherwise you will not be able to manoeuvre it.
- Dress appropriately for the weather; cold water and cold weather can result in hypothermia.
- Do not attempt to make any technical changes to your iSUP. Changes of any kind endanger the operation of this device.
- Never use your iSUP under the influence of alcohol, drugs or medicinal products.
- Never overestimate your own strength and divide your muscular strength with the paddle in such a way that the distance you have paddled away from the shore can be easily paddled back again. Stay in protected coastal areas, no more than 300m away, and pay attention to varying winds and currents which can complicate your movement.
