

WARNING!

The importance of water treatment

It is of great importance that you regularly monitor and appropriately treat the water in your CleverSpa® to maximise your enjoyment from the hot tub and to extend its life. Importantly, you should know that hot tubs can harbour bacteria if not treated correctly and the most common form can lead to Legionella's disease. These risks can increase with the age of the user, but some people are at higher risk including:

- People over 45 years of age
- Smokers and heavy drinkers
- People suffering from chronic respiratory or kidney disease
- Diabetes, lung and heart disease
- Anyone with an impaired immune system

To avoid these risks and maintain and keep your spa water clean and safe, please treat your water regularly, using CleverSpa® chemicals.
